Abstract (en)

[origin: WO2019162305A1] The invention relates to a supporting and reinforcing element for a box gutter for linear-drainage purposes, having a base piece (10) and two side parts (11), which form a U-shaped profile (13) for accommodating the box gutter, wherein the base piece (10) is designed in the form of a bearing means for a base of the box gutter. The invention is distinguished in that the base piece (10) and the side parts (11) form sheet-metal profiles (14) which are bent in an L-shaped manner in each case.
