Abstract (en)  
[origin: WO2019158162A1] The invention relates to a printed circuit board plug-in connector comprising a connector installation housing (3), an insulating body (2) and a shielding connection element (1), for the shielding connection of a plug-in connector installation housing (3) to a printed circuit board, The shielding connection element (1) is flat or has at least one flat deformation section which is arranged, in the plug-in direction, in a through-slit (24) of an insulating body (2) mounted on the printed circuit board, and protrudes out of the insulating body (2) with two contact regions (111) in order to electrically contact the metal plug-in connector installation housing (3).
