Abstract (en)

[origin: WO2019161848A1] The invention relates to a plug connector which can be latched to a mating plug connector (4), comprising a plug connector housing (1) having a plurality of sides each having a flat shape, a plug connector insert which is fixed or at least can be fixed in the plug connector housing (1), and an unlocking sleeve (2) which engages around the plug connector housing (1) and is held thereon so as to be displaceable counter to the plugging direction. According to the invention, at least one polarisation element (3) is mounted on a side of the unlocking sleeve (2). The invention also relates to a system, a method for mounting, a method for plugging, and a method for separating plug connectors and mating plug connectors (4).
