Abstract (en)  
[origin: WO2019162505A1] The present invention relates to a heat not burn (HNB) device comprising a device housing; and at least one heating element. The at least one heating element is housed within a chamber at a first longitudinal end of the housing, the device housing have a first longitudinal end face defining an aperture in communication with said chamber. The device further comprises a sealing plate movable from a first position in which the aperture is exposed to a second position in which the aperture is at least partially sealed by the sealing plate.
