Abstract (en)
[origin: WO2019162631A1] This luggage (10) comprises two shells (12, 14) and opening/closing means (16, 18) that are intended to position the two shells (12, 14) in a manner folded together so as to define an internal volume in the closed configuration of the luggage (10). One of the two shells, referred to as rear shell (12), has at least one transporting handle (24, 26). The other of the two shells, referred to as front shell (14), has on its outer face a groove (34) that extends longitudinally in a main direction of the luggage (10) and at least one receiving strip (36), disposed in the groove bottom (34), covered with removable securing elements that extend freely in the groove (34) along the entire length thereof.
