Abstract (en)

[origin: US2019284399A1] The invention concerns a storage-stable polymer-bonded composition for the formation of coatings on buildings and the like, comprising at least one organic binder, at least one filler and/or pigment, water in order to produce a pasty consistency in the composition, a buffer system which comprises at least one basic silicate, at least one substance which retards the condensation of the basic silicate, as well as optional conventional additives.
