Abstract (en)
[origin: WO2019166291A1] The invention relates to a refrigeration appliance, in particular a household refrigeration appliance, comprising an evaporator (7), a fan (13) for driving an air flow through the evaporator (7), a storage chamber (3, 5) cooled by the air flow, a defrost heater (10) for defrosting the evaporator (7), and a control unit (18) for controlling the operation of the defrost heater (10), characterised in that the control unit (18) is designed to compare a variable (I) representative of a pressure drop at the evaporator with a limit value (Iend) and to start the defrost heater (10) when said limit value is exceeded.
