Abstract (en)

[origin: WO2019166609A1] The present invention relates to a navigation indicating device(100), interfaceable with a portable electronic device (201) such as a tablet or a cellphone or a smartphone. The navigation indicating device (100) comprises at least one light indicator (102a, 102b, 104a, 104b, 105a, 5b, 106) configured to provide an indication of navigation based on a position signal provided by the portable electronic device (201).The navigation indicating device (100) further comprises a housing (101) for the portable electronic device (201), the housing (101) being adapted to allow the vision of a screen of the portable electronic device (201) during the use of the navigation indicating device (100). The present invention further relates to a navigation method. The present invention further relates to a computer program executable by a portable electronic device (201) such as a tablet or a cellphone or a smartphone, said computer program being configured for interfacing said portable electronic device (201) with a navigation indicating device (100).
