Abstract (en)

A transfer unit (12) for feeding reels (6) of labelling material to a labelling module (13) configured to apply labels (2) onto articles (4) is described; the transfer unit (12) comprises: a support member (14) configured to support a plurality of reels (6) organized vertically in at least one a stack (15); and a robotic arm (16) configured to remove at least one reel (6) at a time from the stack (15) at a gripping station (G) and to release it at a release station (R); the support member (14) being movable horizontally, during use, at least from a remote position, where the reels (6) are arranged stacked vertically on the support member (14), to the gripping station (G), where the transfer unit (12) is configured to eliminate a vertical distance between the stack (15) and the robotic arm (16)
