Abstract (en)

The present invention relates to a cooking oven (10) with an oven cavity (12) and a cooling channel (14). The oven cavity (12) includes at least one cavity opening (16). The cooling channel (14) includes at least one guiding channel (18). The cavity opening (16) is connected to the guiding channel (18). The cavity opening (16) is surrounded by a first structure (22). The guiding channel (18) is surrounded by a second structure (24). The first structure (22) and the second structure (24) are formed complementary to each other.
