Abstract (en)

The present invention relates to a remote control system for controlling at least one domestic appliance (14, 16). The remote control system comprises at least one remote control device (10), at least one data cloud (12) and at least one domestic appliance (14, 16). The remote control device (10) is connectable or connected to the data cloud (12) via a first wireless connection (18). The remote control device (10) is connectable or connected to the domestic appliance (14, 16) via a second wireless connection (20). The remote control device (10) includes at least one application software for communicating with the data cloud (12) and the domestic appliance (14, 16). The data cloud (12) comprises a plurality of apparatus files. Each apparatus file includes characteristics of a corresponding domestic appliance (14, 16). The data cloud (12) comprises a plurality of recipe files. The present invention relates to a remote control system for controlling a domestic appliance. Each recipe file includes instructions for a working process of the domestic appliance (14, 16).
