Abstract (en)

[origin: WO2019170319A1] The invention relates to a distributor device, to a method for guiding materials, and to a method for cleaning a distributor device. The distributor device for guiding materials, in particular particulate pharmaceutical solids, comprises: a process chamber (2) having at least one inlet opening (3) and having at least two outlet openings (4), a distributor element (5) for distributing the materials, wherein the distributor element (5) extends through the process chamber (2) in order to connect the inlet opening (3) to one of the outlet openings (4), wherein the distributor element (5) is arranged rotatably about an axis of rotation (6), and a cleaning apparatus (7) which is configured to clean the process chamber (2) and the distributor element (5).
