Abstract (en)

[origin: CA3108294A1] The invention relates to a portable dispenser (10) of a plurality of fluid or paste-like products, which includes: a body (12); a dispensing head (22) rotatably guided and translatably stationary relative to the body (12) about a reference axis (100); at least two pumps (16A, 16B, 16C) with nozzles (54A, 54B, 54C); and a kinematic link (24) between the dispensing head (22), and the nozzles of the two pumps, in order to transform the rotation of the dispensing head (22) into a translation without rotation of the pump nozzles (54A, 54B, 54C). The kinematic link (24) includes a push member (82) connected to the body by a sliding link (58, 98), the push member (82) including dispensing ducts (96A, 96B, 96C) for channelling the fluids exiting from the nozzles (54A, 54B, 54C) towards the dispensing opening (66).
