Abstract (en)

[origin: WO2019172759A1] A capsule for containing a substance from which a beverage can be produced, comprising a capsule body (10) that comprises a base wall and a side wall (12), wherein the side wall and the base wall define a space for containing said substance, and a centre element (28) which extends towards said space from the base wall. The capsule body has been injection moulded including said centre element, wherein there are outlet openings (32) in the centre element for permitting liquid to flow from the capsule body, and wherein a closure element is provided for closing an external end of the centre element.
