Abstract (en)

[origin: WO2019170733A1] The invention relates to a wind turbine (100), comprising a rotor blade hub (112), a generator (120) and a magnetic gear (118) which is connected on the drive side to the rotor blade hub (112) and on the output side to the generator (120). According to the invention, the magnetic gear (118) is designed as a multi-stage, in particular a two-stage magnetic gear (118).
