Abstract (en)

[origin: WO2019170518A1] A pump apparatus for a system housing (10) in a vehicle comprises a pump device (12a) arranged in a pump housing (12), which device can be driven by a motor (M) specific to the pump apparatus or an external motor, wherein at least the pump housing (12) of the pump apparatus can be introduced into a pump receptacle opening (14) of the system housing (10) in such a manner that a liquid conveyed through at least one duct formed in the system housing (10) can be pumped by means of the pump device (12a) driven by the motor (M). The pump apparatus further comprises an suction filter (16a), which is arranged either in the pump housing (12) or in a filter housing (16) mechanically fastened to the pump housing (12). A production method for a pump apparatus of this kind is also disclosed.
