Abstract (en)
[origin: WO2019245500A2] The present invention is related to a front cover assembly which includes an external panel (2) and provides montage of an internal panel (4) and middle panel (7) in a single piece independent from each other to mentioned external panel (2) in a parallel manner, is appropriate for using in the cooking appliances. The present invention also comprise at least two first lathes (3) engaged in a manner such that they are parallel to the surface of mentioned external panel (2) facing the cooking appliance and are mutual to each other, at least one first connection element (6) which is engaged on at least one end of mentioned first lath (3) and having a plurality of first housing (110) in a convenient manner with the gaps extending across the first lath (3) and has an appropriate structure to support the internal panel (4) and middle panel (7) in a predetermined distance between the external panel (2) and the cooking appliance, and at least one second lath (8) which constitutes a structure in a framework form by being fixed on the first lath (3) in a manner such that it has a plurality of channels engaging with the internal panel (4) and middle panel (7) and provides placing mentioned internal panel (4) and middle panel (7) integrally.
