Abstract (en)
[origin: WO2019170967A2] The invention relates to a securing frame (10) allowing quick and easy mounting and dismounting of a flexible, stretched covering, specifically a textile frame for an advertising medium, said frame comprising an assembly of rigid base profiled sections (11) and flexible retaining profiled sections (31) which are fitted onto said base profiled sections (11) so as to obtain a mounted, removable clipping system (30). The base profiled section (11) comprises a first groove (16) and a second groove (17) which are parallel, and the retaining profiled section (31) comprises a first wing (32) and a second wing (33) which extend in two parallel directions, the first wing (32) interacting with said first groove (16) to form the aforementioned clipping system (30), and the second wing (33) being fitted into said second groove (17) of the base profiled section (11) in order to obtain a fixed, dismountable coupling for said retaining profiled section (17).
