Abstract (en)
[origin: WO2019170185A1] The invention relates to a battery system (10, 100, 110) comprising a battery accommodating device (20) and one or more battery units (30). According to the invention, the battery unit (30) can be inductively coupled to one another and/or to the battery accommodating device (20) for charging and discharging, the battery accommodating device (20) can be connected to an external electrical energy source and/or energy sink, the battery unit (30) comprises a coil unit (42) and the battery accommodating device (20) comprises for each battery unit (30) that can be accommodated a bearing receptacle (50) with a coil unit (26), which can be coupled in a magnetically complementary manner, for insertion and removal of a battery unit (30) without tools.
