Abstract (en)
The present invention relates to a dispenser (130, 200) configured to be releasably attached to a suction tube (120) of a vacuum cleaner (100). The dispenser comprises a container (220) configured to receive a deodorising agent (310, 320, 330) arranged in a first state, an activator (210) configured to transform the deodorising agent into a second state and a dispensing outlet (420) configured to be fluidly connected to a suction passageway of the tube and to release the deodorising agent, arranged in the second state, into the suction passageway.
