Abstract (en)

[origin: WO2021005228A1] The invention relates to a walking aid for taking up a deployment supported force for supporting a person using the walking aid, comprising a support upper part for engaging around the person, a shaft and a support foot arranged at a lower end of the shaft and having multiple swivellable support legs which can be moved between a storage position in which they are folded out from one another at a predefined angle and the walking aid can be set down on the ground, and a use position in which the support legs are folded together and arranged next to one another and the walking aid can be used, characterised in that the support legs are swivellably retained at a lower end of the shaft, and in that they are designed for taking up the deployment supported force in the use position.
