Abstract (en)

The present invention relates to household articles, and more particularly to an adjustable effort-saving mechanism for furniture flip-up support. The adjustable effort-saving mechanism comprises a base (1), a fixing member (2), a first link (3), a connecting assembly (4), and an elastic assembly (5). One end of the first link (3) is hinged to one end of the fixing member (2), and another end of the first link (3) is hinged to one end of the connecting assembly (4). Another end of the connecting assembly (4) is hinged to the base (1). One end of the elastic assembly (5) is hinged to the base (1), and another end of the elastic assembly (5) is hinged to the connecting assembly (4). The elastic assembly (5) provides the user with assistance in opening and closing the furniture, thereby enabling the user to open and close the furniture in an effort-saving manner.
