Abstract (en)

A panel structure of an air conditioner, an air conditioner, a method, a device, and a storage medium, belong to the technical field of air conditioners, and solve the problems of a high wind speed blown out by the available air conditioner and of a poor user experience effect. A panel structure of an air conditioner, comprising: an air deflector (1) and an assembly (2) of vertical flaps, the air deflector (1) being provided with a first microhole structure (11) penetrating in the thickness direction thereof and swinging up and down under the driving of a motor of the air deflector; the assembly (2) of vertical flaps comprises a swing rod (21) and one or more vertical flaps (22), the flaps (22) being provided on the swing rod (21), the swing rod (21) driving the vertical flaps (22) to swing left and right under the driving of a driving motor of the swing rod, and the vertical flaps (22) being provided with a second microhole structure (221) penetrating in the thickness direction thereof.
