Abstract (en)

[origin: EP3764031A1] An integrated air duct module (100), wherein the distributed structure of traditional air ducts is changed and a modular structure is used so as to improve the precision in the assembly of a refrigerator, being applied to a two-door refrigerator and eliminating the traditional refrigerator structure by providing an air vent at a side of a refrigerator compartment (30), thereby preventing a convex structure that occupies the storage capacity of the refrigerator compartment (30) from forming at a top portion of the refrigerator compartment (30), increasing the storage space of the refrigerator compartment (30).
