Abstract (en)
[origin: CN112217023A] A contact carrier (1) comprises a side wall (6), a contact fixing device (9) which is provided for fixing the at least one contact element (7) to the contact carrier (1), and an insertion opening (4) which is arranged on the side wall (6) and is used for inserting a tool. The contact fixing device (9) has two sections (91, 92) between which the tool (3) can be introduced. The contact fixing device (9) is provided for fixing a contact element (7) arranged on the contact carrier (1) in a fixed position, and by operatively connecting the tool (3) to the contact fixing device (9) via the insertion opening (4), the contact fixing device can be transferred from the fixed position to a released position in order to release the contact element (7) from the contact carrier (1). According to the invention, sections (91, 92) of the contact fixing device (9) are each connected to a side wall (6) of the contact carrier (1) at a connection point (61, 62).
