Abstract (en)
[origin: WO2019175098A1] The invention relates to a method for aerating a space, comprising at least one housing provided with an air channel formed inside said housing, and a fan arranged in the air channel, said air channel merging into an air outlet element comprising air outlet openings. Said device is characterised in that the air outlet element forms an outflow chamber, and in that an air rectifier is arranged in the air channel.
