Abstract (en)
[origin: WO2019175739A1] The invention concerns feed additives containing a combination of a high intensity sweetener and capsicum oleoresin. More precisely, the invention relates to a feed additive to be supplemented to a feed in order to prepare a final feed for mammals, including a combination of - at least one high intensity sweetener; and - capsicum oleoresin; wherein the weight ratio of the high intensity sweetener to capsicum oleoresin is less than or equal to 25:1. The invention also pertains to a final feed including the above feed additive in an amount greater than zero and less than or equal to 200 ppm based on the weight of the total final feed. Further the invention relates to the use of the above feed additive or final feed to improve zootechnical performance of mammals, in particular rabbits, swine and calves.
