Abstract (en)  
[origin: WO2019175054A1] The present invention relates to a mixing device, comprising a container (1) for receiving material for mixing, wherein a discharge opening (5) is disposed in the base thereof, and a closure lid (6', 6'') for closing the discharge opening (5). In order to provide a mixing device which has a discharge opening (5) that can be opened and closed in a simple and space-saving manner, it is proposed according to the invention that the closure lid (6', 6'') consists of two closure lid parts (6', 6'') which can be moved back and forth relative to one another between a closed position, in which the two closure lid parts (6', 6'') contact each other and together form the closure lid (6', 6''), and an open position, in which the two closure lid parts (6', 6'') are spaced apart from one another, so that an opening for removing the material for mixing from the container (1) is formed between the two closure lid parts (6', 6'').
