Abstract (en)
[origin: WO2019175513A1] A container for fluid product (1) comprises a single glass part (2). The single glass part (2) comprises a shoulder (3) and a neck (4) that define an internal channel (5). The container for fluid product (1) comprises a closing member (11) tightly mounted in the inner channel (5). The closing member (11) is designed to carry a dispensing member (20) suitable for dispensing content from the container for fluid product (1) out of the container for fluid product (1) through the closing member (11). The closing member (11) further comprises at least one sealing lip suitable for forming a sealing area between the neck (4) and the closing member (11).
