Abstract (en)

[origin: WO2019175420A1] In particular, the invention relates to a goods wagon (1), for example in the form of a double pocket wagon (1), comprising a head piece (12) at the front end of the goods wagon (1), an end piece (13) at the rear end of the goods wagon (1), and two elongated supports (11.1, 11.2) which extend between the head piece (12) and the end piece (13). A basin (2) for goods is provided, said basin defining a basin loading surface (20), and the elongated supports (11.1, 11.2) define a pocket (10) into which the basin (2) is inserted. According to a first aspect, securing elements (110a, 110b) for the basin (2) are provided on the elongated supports (11.1, 11.2), said securing elements specifying a loading position for the basin (2) in the pocket (10) of the goods wagon (1).
