Abstract (en)

[origin: WO2019175157A1] The invention relates to a fitting assembly (5) for a leaf frame (4) of a window (1), comprising a fitting part (3), which has a cover rail (11) that is secured to the leaf frame (4) and a drive rod (6) that is movably mounted relative to the cover rail (11), and a sensor device (15) with a sensor assembly (17), which is arranged in a sensor housing (16) and has at least one position sensor (18). The sensor device (15) lies against the cover rail (11) in an uncoupled manner from the drive rod (6) and is secured or can be secured directly to the cover rail (11) and/or the leaf frame (4). The invention further relates to a window (1), to a method for operating a fitting assembly (5), to a method for installing a fitting assembly (5), and to a sensor device (15).
