Abstract (en)

[origin: WO2019175541A1] A locking device (10) for a door (100) of a cubicle (110), the locking device (10) comprising: a fixed base section (20) provided at the side wall (112); and a retractable section (30) which laterally extends from the base section (20) to a normal use position in which the door (100) is prevented from pivoting outwards from a closed position, wherein the retractable section (30) is movable to an emergency use position in which the door (100) is free to pivot outwards from the closed position, and wherein the locking device (10) includes inhibiting means adapted to inhibit lateral movement of the door (100) relative to the locking device (10) when the door (100) is in a closed position.
