Abstract (en)  
[origin: EP3766385A1] The present invention refers to a modular floor tile consisting of a set of modules encased sequentially into each other, wherein each module of the modular floor tile (1) comprises 2 components, specifically 1 section of the interior or exterior modular floor tile (2) and 1 detachable base (3), and this detachable base (3) is encased into and fixed on the bottom part of the section of the interior or exterior modular floor tile (2). The detachable base (3) of each module of the modular floor tile (1) comprises at least 1 upright fastening spigot (4) which is fixed on the top face of the detachable base (3), the upright fastening spigot (4) serving for encasement into and fastening onto the section of the interior or exterior modular floor tile (2). The detachable base (3) of each module of the modular floor tile (1) comprises upright holes (5) distributed across the length of the detachable base (3) .
