Abstract (en)  
[origin: CN112238996A] The invention relates to an inner frame (10) for storing packages of goods, in particular rod-shaped goods such as cigarettes, tobacco rods and the like. The inner frame comprises a front wall (12); side walls (14, 16) connected to the front wall (12) by bending lines (18, 20); and at least one engagement and visual aperture (22) in the region of the front wall (12), wherein the front wall (12) comprises at least one wall element (24) at least partially removably connected to the front wall (12), and the wall element (24) is formed such that it at least partially covers the engagement and visual aperture (22). Furthermore, the invention relates to a package having such an inner frame (10).
