Abstract (en)  
[origin: EP3767195A1] The present disclosure provides an air deflector assembly and an air conditioner with the air deflector assembly, it includes a first driving portion, a second driving portion, an air deflector portion and an air sweeping portion, the first driving portion is connected to the air deflector portion, and the air deflector portion driven by the first driving portion is rotatably arranged; the air sweeping portion is located on a side of the air deflector portion, the second driving portion is connected to the air sweeping portion, and the air sweeping portion driven by the second driving portion is rotatably arranged; wherein the air sweeping portion includes an air sweeping connecting rod, the air sweeping connecting rod includes a rod body portion and a snap assembly, the rod body portion is connected to the air deflector portion, the snap assembly is provided at an end portion of the rod body portion, and the snap assembly is snap-fitted with the second driving portion. By arranging the snap assembly on the air sweeping connecting rod of the air sweeping portion and snap-fitted the snap assembly with the second driving portion, the separation of the air sweeping portion from the air deflector portion is realized, so that the service life of the portions is extended, the assembly reliability of the air deflector assembly is enhanced, the production efficiency is improved, and the cost of the whole machine is decreased.
