Abstract (en)

[origin: WO2019219319A1] The invention relates, inter alia, to a rail vehicle (10, 11, 12) having a control device (100) for controlling the rail vehicle (10, 11, 12). According to the invention, the control device (100) is based on artificial intelligence and has been trained to control the rail vehicle (10, 11, 12) on at least one predefined section of track.
