Abstract (en)
[origin: WO2019179679A1] The invention relates to a points transport vehicle (10) comprising at least one loading platform (18) for receiving a load (20), which platform is pivotable into a transport position (10) and a loading position (10') about a pivot axis (23) extending in the longitudinal direction of the vehicle, comprising at least one elongate support element (24) for fixing the load (20) to the loading platform (18), and comprising a first holding element (26), which is designed to rest on the load (20), a second holding element (28) being provided on the support element (24) and being designed to rest on the load (20), and at least one of the two holding elements (26, 28) being displaceable on the support element (24) in relation to the other holding element (26, 28) in order to releasably fix the load (20) on the support element (24) between the first and the second holding element (26, 28).
