Abstract (en)
[origin: WO2019179940A1] The invention relates to a sealing unit for a door having at least a first and a second door leaf, which sealing unit has a first sealing device (V) for fastening to the first door leaf (S) and a second sealing device (V) for fastening to the second door leaf (G), the first sealing device (V) having an end face facing the second sealing device (V). Said end face has a sealing surface (4) for sealing contact of the second sealing device (V) in the closed state of the door. The sealing unit facilitates complete sealing in the case of two-leaf and multi-leaf doors.
