Abstract (en)

[origin: WO2019202261A2] The present invention relates to a heat exchanger (1) comprising an inlet duct (31) and an outlet duct (32) for a heat transfer fluid, onto which a heat transfer fluid supply pipe (21) and a heat transfer fluid discharge pipe (22) are intended to be slipped, respectively. According to the invention, both the inlet duct (31) and the outlet duct (32) have on their outer surface means for sealing and fastening the corresponding pipe (21, 22) and a collar (34) forming an insertion stop for the pipe (21, 22) on the corresponding duct (31, 32).
