Abstract (en)

[origin: EP3769657A1] A cup holder (2), a bowl basket assembly with the cup holder, and a dishwasher are disclosed. The cup holder (2) is configured to be mounted on a dishwasher bowl basket (1) and includes a cup bracket (25) and a goblet bayonet (23). The cup bracket (25) is configured to place a cup. The goblet bayonet (23) is provided on a first side of the cup bracket (25) and is configured to accommodate a foot of a goblet. A second side of the cup bracket is provided with a mounting portion for mounting the cup holder (2) on the dishwasher bowl basket (1). The first side and the second side are opposite sides of the cup bracket in a width direction. When the cup holder (2) is mounted on the corresponding dishwasher bowl basket (1), many different types of cups can be placed simultaneously. For example, a tea cup and a mug and the like are placed on the cup bracket (25). The goblet bayonet is used for placing the goblet to make full use of the space of the dishwasher bowl basket (25), and the convenience and flexibility of the corresponding dishwasher products are improved.
