Abstract (en)
The present invention relates to a preassembled track apparatus, which can be transported in a preassembled state, intended to be installed on track on a concrete slab and which, after a first verification in the workshop, does not have to be disassembled for transport, is light for transportation and reduces assembly times. The preassembled track apparatus (1) comprises at least two rails (2) equipped with a skid and has braced sleepers (3) comprising holes (10) separated at a distance in the longitudinal direction of the braced sleeper (3) and at different heights. The track apparatus comprises braces (11) able to be coupled to the holes (10) which fasten the position of the braced sleepers between them (3).
