Abstract (en)

[origin: EP3770354A1] The roof window arrangement comprises a roof window with a stationary frame and a sash (2). A manual operating assembly (4) is configured to assist in operation of the sash (2) between open and the closed positions, and includes a handle portion (41) located at the top member (21) of the sash (2) and having a longitudinal extension substantially in parallel with the top member (21) of the sash (2). The handle portion (41) of the manual operating assembly (4) is provided with receiving means configured to receive an exchangeable appliance member (10) in a releasable connection.
