Abstract (en)

[origin: EP3770355A1] In the roof window arrangement, a manual operating assembly (4) assists in the operation of the sash (2) between the open and the closed positions. The manual operating assembly (4) includes a handle portion (41) located at the top member (21) of the sash (2) and has a longitudinal extension in parallel with the top member (21) of the sash (2). An electrical operating assembly (6) is provided as well and assists in the operation of the sash (2) between the open and the closed position. The manual operating assembly (4) is provided with an integrated control unit (8) to cooperate with the electrical operating assembly (6). The integrated control unit (8) comprises a control part (82) formed in the handle portion (41), or in at least one of the handle portions, of the manual operating assembly (4) and may be comprised in an interactive surface segment (44) of the handle portion (41) of the manual operating assembly (4).
