Abstract (en)

[origin: EP3770356A1] The upgrade kit comprises an electrical operating assembly configured to assist in operation of the sash (2) between the open and the closed position, and a set of appliance members including at least a first appliance member in the form of a remote control unit (9) configured to cooperate with the electrical operating assembly. In turn, the remote control unit (9) includes a control portion (91) and an engagement portion (92) to be held on the manual operating assembly (4) of the roof window in a positive or non-positive engagement. The engagement may be provided by forming the engagement portion (92) with snap-on means to be connected with the handle portion (41) of the manual operating assembly (4).
