Abstract (en)
[origin: CA3082665A1] The invention relates to a submersible light, in particular for a swimming pool, comprising an elongated profiled inner housing into which an LED strip having a plurality of light-emitting diodes is inserted, and an elongated profiled outer housing into which the profiled inner housing is inserted, an inner region of the profiled outer housing between the end thereof and the associated end of the profiled inner housing being filled with a cured potting compound on both ends of the arrangement of the inner and profiled outer housing. The invention also relates to a method of making a submersible light. FIG. 3.
