Abstract (en)

[origin: US2021038936A1] The invention relates to a test method for testing a system for automated monitoring of a protection readiness of a fire protection system. The test method comprises the following steps: Receiving at least one test parameter of the system, evaluating the at least one test parameter on the basis of at least one specification for the at least one test parameter, and determining, on the basis of the evaluation, a quality indicator indicating the quality of the system's monitoring of the fire protection system.
