Abstract (en)

[origin: WO2019191793A1] The invention relates to a loading rail (11) for a drawer pull-out guide (4) , comprising a first rail (12) fixed or to be fixed to a drawer (3), a second rail (13) arranged or to be arranged on a carcass rail (9) or central rail (14) of a drawer pull-out guide (4), wherein the first rail (12) and the second rail (13) can be connected to each other by pushing on, and wherein the first rail (12) and the second rail (13), when connected, are locked to each other by means of at least one locking element (21), wherein the locking element (21) is preloaded in the direction of a locking position by a force of a force store (25). The locking element (21) is arranged on the second rail (13) and, as the first rail (12) is pushed onto the second rail (13), can be pivoted starting from the locking position counter to the force of the force store (25) about an axis (26) extending horizontally in the mounting position in the direction of the carcass rail (9) or the central rail (14) of the drawer pull-out guide (4), into a release position.
