Abstract (en)

[origin: WO2019195262A1] A single-ply liner label combination and liner-label combination roll are provided. Each liner label combination including a liner substrate and a label substrate. The label substrate including at least one inner and partially perforated second label. The backside of the label substrate including adhesive but a first portion of an area of the backside that corresponds to the inner and partially perforated second label including an adhesive deadener applied over the adhesive within the first portion. A second portion of the area retains the adhesive in a pattern along a periphery of the backside that corresponds to the inner and partially perforated second label.
