Abstract (en)
[origin: WO2019197191A1] The invention relates to a multichamber cartridge (1) for separately storing for example a binder and a curing agent for a synthetic resin and jointly pressing out said binder and curing agent using a conventional cartridge press for a single-chamber cartridge. To this end, the invention proposes a multichamber cartridge (1) with a telescoping cylinder (3) as an inner chamber which is arranged coaxially in a tubular outer chamber (2).
