Abstract (en)
[origin: WO2019185902A1] The invention relates to a manually operated water treatment device (1), which is in particular portable or transportable, having water inlet means (2), manual pumping means (3), a filter (4), a water outlet (5), a closed drain outlet (6), and preferably a blow-off (42), characterized in that it has a distribution chamber (7) which is arranged between the filter (4) and the water outlet (5) and which stores the clean filtered water output by the filter (4) to be dispensed through the water outlet (5), the distribution chamber (7) communicating directly with the filter (4), and the water in the distribution chamber being able to be sent under pressure into the filter in order to carry out backwashing of the filter.
